RE: Compatibility Between Cable Systems and  
Consumer Electronics Equipment  
(Section 17, 1992 Cable Act)

Rep. Edward J. Markey, Chairman  
House Subcomm. on  
Telecommunications

As owners and users of TVs and VCRs, we strongly support measures designed to encourage compatibility of these products with cable service. Please affirm our right to buy and use fully capable consumer electronics equipment. We should not be denied the right to own TVs and VCRs that can tune and record the cable signals we pay for.

- \* We **OPPOSE** any cable scrambling or channelization techniques that would require us to rent a converter box or buy a separate subscription for every TV and every VCR in our homes.
- \* We **SUPPORT** "point-of-entry" systems that transmit all authorized cable signals within our homes in descrambled form, so we can use the display and recording features of our TVs and VCRs.
- \* We **SUPPORT** national standards for digital compression and transmission, so that we can buy new TVs and VCRs that **will** be able to tune all the cable signals we purchase.

Senate Subcomm. on  
Technology & the Law

RE: Compatibility Between Cable Systems and  
Consumer Electronics Equipment  
(Section 17, 1992 Cable Act)

Rep. Edward J. Markey, Chairman  
House Subcomm. on  
Telecommunications

As owners and users of TVs and VCRs, we strongly support measures designed to encourage compatibility of these products with cable service. Please affirm our right to buy and use fully capable consumer electronics equipment. We should not be denied the right to own TVs and VCRs that can tune and record the cable signals we pay for.

- \* We **OPPOSE** any cable scrambling or channelization techniques that would require us to rent a converter box or buy a separate subscription for every TV and every VCR in our homes.
- \* We **SUPPORT** "point-of-entry" systems that transmit all authorized cable signals within our homes in descrambled form, so we can use the display and recording features of our TVs and VCRs.
- \* We **SUPPORT** national standards for digital compression and transmission, so that we can buy new TVs and VCRs that **will** be able to tune all the cable signals we purchase.
